Check your pet fish's horoscope by looking at its birthday or when it arrived in your home!

Taurus Apr 20 - May 20

The plastic plants in the next aquarium always look greener. Don't be fooled by appearances. A treasure chest might be hiding right under your fins!

Gemini May 21 - June 21

This month could be hazardous. Watch out for nets, filter intakes and cat paws! Make sure to look both ways before crossing the tank.

Cancer June 22 - July 22

Don't be afraid to take the bait. Your time has come to swim to the top and succeed at what you do. Make a splash!

Leo July 23 - Aug 22

Your future looks murky. Time for a water change. Take action by flicking algae at your owner. The message will come across loud and clear!

Virgo Aug 23 - Sept 22

Unexpected events may make you feel like a fish out of water. Don't worry. Go with the flow and everything will be all right.

Libra Sept 23 - Oct 22

You're looking green around the gills. Unless that's your natural color, better take it easy this month. Pamper yourself with a relaxing 'finicure' treatment.

Scorpio Oct 23 - Nov 21

This is your month. You're swimming circles around them all. You can't fail, so go for it. Reach for the fluorescent lights!

Sagittarius Nov 22 - Dec 21

Love is in the water! The perfect mate could be behind the next rock. Start polishing those scales and show off your dazzling colors.

Capricorn Dec 22 - Jan 19

A new companion will soon join your community tank. Nope, it is not a red herring! Don't be a cold fish. Extend a warm welcome.

Aquarius Jan 20 - Feb 18

You're spending too much time watching humans. Get off the gravel bed and go play. Race friends or have bubble-blowing and pebble-spitting contests!

Pisces Feb 19 - Mar 20

Careful, troubled waters ahead! Remember what you learned in school: when swimming together, stick to the middle. It's better to be tickled than nibbled!

Aries Mar 21 - Apr 19

Is your tank half empty or half full? This month, your attitude will make all the difference. Whatever the water level, think positive!

Did you know that...

- The largest fish is the great whale shark reaching fifty feet in length.
- Fish feel pain and suffer stress just like mammals and birds. ©
